

ASSIST System Mind Map

Overview:

Mind mapping is becoming increasingly popular as a method of visualizing and understanding complex systems. This workshop will introduce you to the basics of mind mapping within the ASSIST platform. In a small group interactive session, you and your peers will begin to create a system mind map of ASSIST. You will gain an in depth understanding of the relationships between the various thrusts, projects, and test-beds of ASSIST. In addition you will work to identify potential industry links and research gaps within the system.

Date: Sept 29th, 9:00-10:30 OR Oct 3rd, 2-3:30PM

Moderator: Tom Snyder

Expectations: Participate in the session on Sept 24th. After the session, you are expected to work with your group to complete the mind map. You will then schedule a time to meet with Tom to present and discuss your final product. (Total time commitment is roughly 1/2 day.)
